

We hope this finds you well in this interesting time.

This is a short email to let you know what we are doing at Foot Focus Podiatry to maintain our safety and hygiene during this health conscious period.

All of our team are regularly washing their hands and using hand sanitiser. Our Podiatrists are wiping their work areas with disinfectant after every patient.

In reception we are regularly be wiping down the reception bench, eftpos machine and door handles with disinfectant. There is also hand sanitiser available for patients to use.

We have changed to disposable paper towels in the bathroom.

In addition to this, we are doing the easy things for ourselves that we suggest for you as well. Plenty of sleep, good food and exercise.

Should you are feel apprehensive chat with our staff. Podiatrists can wear a mask if this helps give you peace of mind.

If you have any signs/symptoms of illness, or if you are in a period of self-quarantining, please do not come into this clinic.

More information on Covid-19 you can visit the [Health.gov.au website](https://www.health.gov.au)

Yours in Health

From the team at Foot Focus Podiatry
